

If you want to offer wireless internet to your guests and you want to do it RIGHT, read our "Buyer's Guide" on page 2.

Questions? Ready to get started?  
Call us at 919-859-3255

## Easy. Cost-effective. Secure.

### The Numbers Say It All . . .

. . . 71% of travelers access the Web or check e-mail daily. And when asked what they want most at a hotel, 40% of American travelers answered, "Web access."\* Today's hotel patrons are looking for more than complementary coffee. They want to stay connected.

### Wiresnap Gives You That Connection . . . and More

When you choose **Wiresnap** to install and manage the wireless internet for your hotel(s), you're doing much more than providing your guests with a valued amenity. You're partnering with a company that has the technology and experience to make the process easy for you and enjoyable for customers.

Wiresnap's wireless access point splits a single connection and makes the internet available to hotel visitors. This same connection is also used to provide separate and secure internet services to your back offices. No wiring is necessary, so the cost to get up and running is minimal. And because the Wiresnap solution is a complete turnkey operation, you and your employees aren't burdened with technical issues that take you away from running your business.

### Security and Support : Top Priority

Don't be fooled by wireless providers who offer a cheap "plug-and-leave" solution. Wiresnap does much more than simply install your system, we manage it - providing fast, reliable and consistent internet connection that is continuously monitored and protected. When you or your patrons have questions, our support is readily available. And best of all, this complete setup comes at a price that is both affordable and up-front.

It won't be long before wireless internet will be a standard amenity at all hotels. Get a jump on the competition and make it available today. Wiresnap makes it easy for you to get connected.
